Liquefied Petroleum Gas Storage Tank(s) Installation Permit Application

Permit is required for the installation of an LPG Container exceeding 30 gallons individual water capacity or combined containers exceeding 60 gallons water capacity. Application must be returned with the following information to obtain a permit to install.

Size of Tank(s) (water capacity in gallons) _____ Type of Tank _____

NOTE: For Underground Tank installations *pictures must be submitted* to the Seabrook Fire Department.

- a. Site plan showing property building(s), lot lines and tank location.
- b. Indicate the measurements in feet the distance of the LP storage tank(s) to building(s) and nearest lot line(s), other structures, sources of ignition and opening into buildings.
- c. Show supply line(s) from tank to building(s).

Temporary installations (under 30 days) still require a drawing to be on file at the Seabrook Fire Department within five (5) days after installation which addresses all of the above items. No permit or permit fee is required for temporary installations.

Installation shall comply with NFPA 1, and NFPA 58, (editions as adopted by NH Fire Code SAF-C-6000 and local ordinances)

Please Note: All gas piping and device installations require an additional permit from the Building Department.

Permit Fee: \$50.00 payable to: Town of Seabrook

All work shall conform to minimum requirements as outlined by NFPA 30, NFPA 1, NFPA 326 and/or 327, editions adopted by NH State Fire Code SAF-C-6000 and local ordinance.

No work shall begin until a permit has been issued by this Department. All inspections and Permit requests require a 48 hour minimum notice.
