Proposal Due Date:
December 7th, 2023

ADDENDUM #1 –

Questions:

Responses are noted in red

1. It does not say how you want the vacuum pump driven off the PTO. Belt, gearbox or hydraulic drive?
The pump should be gearbox driven.
2. It also states the you want a air shift PTO. That is odd for the Allison transmission. They are usually a hot shift PTO. So, I would like to know if this is correct?
The air shift PTO line is meant to give freedom to choose a Chelsea PTO with Smart Start, Muncie PTO with a Start Module, or other similar products that are able to start and run the blower/pump in a safe manner while handling the torque spike.
3. As it pertains to the Make of the chassis is there a preference based on location of dealer or repair facility?
Proposals will be considered from any manufacturer that meets or exceeds all specifications. Multiple chassis manufacturer options are welcome, value driven options are always encouraged.

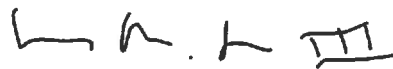

The Request for Proposals is modified as set forth in this Addendum. The original RFP Documents and any previously issued addenda remain in full force and effect, except as modified by this Addendum, which is hereby made part of the RFP. Respondent shall take this Addendum into consideration when preparing and submitting its Proposal.

This Addendum must be Signed & Returned with your Proposal.
